Table of Contents

Installation

Standard installation, see PrestaShop documentation for more informations :

http://doc.prestashop.com/display/PS17/Modules+Selection#ModulesSelection-Installingorpurchasingamodule

Configuration

Categories to export

Select categories for which you wish to export products.
By default, all categories are selected.

Tab Catalog > Simple Catalog Export

Only products created since last export : enable this option to only export products created since the last use of this feature.

Products created since: manually select the creation date of products to export.

Support

This is a free module, at the disposal of PrestaShop community, therefore no technical support will be given from us. The module is provided "as is", without any guaranty (see LICENCE.md).

The module being fairly simple, in cas of technical support, your webmaster and/or web agency should have the necessary technical knowledge to fix and/or adapt the module to your shop.

In case of known bug, you can create a bug report on GitHub following the procedure described in the header of the module configuration :

https://github.com/Common-Services/simplecatalogexport/issues
